

Business Leader's Cyber Security Checklist

According to the Cyber Security Breaches Survey 2020, almost half of UK businesses and a quarter of charities have reported cyber security breaches in the last 12 months.

Cyberattacks are now one of the biggest threats to emerge from the developing Covid-19 pandemic, due to millions of people working from home, away from security procedures in the workplace. To safeguard businesses, leaders must prioritise cybersecurity to understand cyber risks and how to rectify them. Follow our Cyber Security checklist to identify & address potential cyber threats to your business.

PHASE ONE: REVIEW CYBER RISKS

- Conduct a cyber security review
- Assess the technical vulnerabilities of the organisation
- Identify the improvement activities required to address the issues identified
- Create a high-level, costed and prioritised improvement plan

PHASE 2: ASSESS CYBER MATURITY

- Conduct a cyber risk assessment
- Reassess cyber maturity and performance against industry KPIs
- Mobilise the cyber security improvement plan
- Embed cyber security best practices into the organisation
